

Metropolitan Bumper for iPhone 5

TOP Protection + 3D videos without glasses!

Eassee3D® technology is MADE IN GERMANY, with which you can watch 3D movies on all current iOS devices (iPhone / iPad). The system consists of the Eassee3D® app, that can be downloaded from the iTunes store, and the respective frame clip for the corresponding iPhone / iPad.

Eassee3D® Metropolitan Bumper for iPhone 5

This is a robust aluminum bumper, in which the iPhone 5 can be put. The bumper surrounds the iPhone safe from all sides and protects it from scratches and bumps - such as in a fall. The slider with the Eassee3D Parallax Layer lenticular sheet can be pushed in front of the display.

A second slider without film is on the back of the bumper. In this way, the housing is completely enclosed so that the iPhone can not slip out of the bumper. Both sliders can be replaced, so that in case the 3D film is not required, this slider can be easily exchanged with the rear-side.

Stylish & secure

In the high quality, functional and aesthetic designed Eassee3D® Metropolitan Bumper the iPhone 5 is always completely safe and always a few millimeters away from any sources of danger.

The integrated slider mechanism allows the removal at any time of the iPhone 5 as well as the use of Eassee3D® Parallax Layer lenticular film.

Slider technology with integrated Eassee3D® film

The slider with the Eassee3D® Parallax Layer lenticular film simply pushed into the upper hub you can enjoy 3D without glasses starting anytime, anywhere. The slider has been designed so that all functional elements remain readily operable by the film and thus the touch functionality remains 100%.

3D videos without glasses with 727.040 pixels

The Eassee3D® technology supports all 727.040 pixels of the iPhone 5, thus generating 568 different informations for both the right and the left eye. So you get playback of 3D videos in side by side format in brilliant quality.

The Eassee3D® system

Eassee3D® is a system for playback of 3D content on high-quality displays. It uses the latest, patented Parallax Layer lenticular technology that makes it possible to interlink two different video image informations in a way that in playback with the original Eassee3D® FrameKit a very clear 3D effect is perceived.

The current Eassee3D® App is available at the Apple iTunes Store for free download. With the app it is possible to watch your own videos, which are loaded via iTunes on the iPhone / iPad. In addition to already over 280,000 videos that can be enjoyed in 3D on Youtube.

Look for the Eassee3D® PLAY characters. You can find it in the future more and more on different websites. It points out that from this point simply a corresponding 3D video on the iPhone / iPad can be played, press link and follow the instructions.

Creating some links to 3D videos to distribute them via email, Facebook, blog, or your own website? No problem. Eassee3D® provides on www.eassee3d.de a free Eassee3D® link generator which generates 3D with a callable 1-click links.

QR codes bring immediately to the goal. Eassee3D® supports this technology. Scan Eassee3D® QR code and assume directly Eassee3D® app playback of the corresponding 3D video. Thus, millions of websites offering direct access to their 3D content. Simple and for free.

The **virtual 3D camera** is part of the newest Eassee3D® app version. Make your own 3D pictures and enjoy them directly on your iPhone or iPad. There is no need to buy a 3D camera any more. The new Eassee3D® app includes it FREE of charge. You can share your 3D pictures instantly by email or on Facebook.

The new **Eassee3D® Realtime Converter** converts every mp4 movie in realtime to 3D. The new algorithm makes it possible to enjoy every 2D movie now in 3D with great performance. Access your 2D clip, choose 2D/3D and enjoy instantly your favorite movie in 3D. You never will run out of stock promised.
